

FACILITIES SERVICES

Customized and Comprehensive

PPM

An EMCOR Company

MOR PPM (PPM) provides a full suite of facilities support services tailored to your unique needs, including facilities management, soft craft services (scaffolding, coatings, insulation), landscaping, janitorial, HVAC, and more. Our ability to consolidate a full suite of offerings under one roof allows for cross-training that helps you lower overhead costs and improve efficiency.

Soft Craft and Specialized Services

PPM provides scaffolding, insulation, and specialized coating/lining services to our nested sites and to select individual clients. We can evaluate your coating needs and propose solutions based on corrosion and other unique factors. We also cross-train craft workers to erect scaffolding and perform insulation services. This allows for fewer workers and a more productive workforce.

Advanced Building and Facilities Maintenance

We employ the latest in advanced technology solutions— such as handheld wireless facilities systems and computerized maintenance management systems (CMMS). This helps optimize our work, so you can optimize your production.

Full-Service to Suit Your Needs

HVAC technicians can also be part of your nested workforce, preventive maintenance program, or as-needed solution from our EMCOR network of companies. We even supply commercial landscaping and ground services personnel whenever needed.

OUR MARKETS

Pulp and paper
